**DO OR DO NOT.
THERE IS NO TRY.**

Cloud-based Windows

Your new Windows in the cloud, completely personalized: your desktop, apps, settings, and content are stored in the cloud, not on the device

Access from anywhere

Accessible from any device – PC, Mac, iOS, or Android, by a dedicate Windows 365 App or through the browser

Secure by design

Built on a Zero Trust security model, it offers built-in security, supports natively MFA and data encryption, automatically updated

Simple Management

Managed through Microsoft Intune, allowing easy control and updates without complex IT infrastructure

WHAT IS WINDOWS 365

Optimized for efficiency

M365 Ready for Individual and Organizational Growth, Bypassing the Need for Complex Infrastructure

Versatility for every user

Whether it's for temporary staff, executives seeking convenience on the go, or power users handling demanding applications, W365 adapts effortlessly

Scalability

Easily adaptable for both individual and enterprise needs, with no complex hardware

Cost-Efficiency

Reduces hardware reliance, lowers IT costs, and streamlines operations

OPTIMIZED, VERSATILE, COST EFFICIENT

Simplified Infrastructure

Windows 365 eliminates the need for complex on-premises infrastructure and the intricacies of traditional VDI solutions, offering a streamlined cloud-based approach.

No Additional Learning Required

Windows 365 is managed using familiar tools like Intune and Windows Update for Business, meaning IT admins can leverage their existing knowledge and expertise. This eliminates the need for extensive training or a learning curve.

Streamlined Management

IT Admins can deliver and manage Windows 365 efficiently using tools they are already comfortable with. This ease of management translates to time and resource savings, allowing IT teams to focus on more strategic initiatives.

A GAME-CHANGER FOR IT ADMINS

USE CASES: FLEXIBILITY AND SECURITY IN THE CLOUD

Enhanced Security

Ensures that data is stored securely in the cloud and not on local devices, greatly reducing the risk of data breaches

Powerful PCs

Provide high-performance computing environments suitable for developers and graphic designers

Bring your own PC (BYOPC)

Allow employees to use their personal devices while maintaining a secure, cloud-hosted Windows environment, ensuring consistency and security, regardless of the device used

Shared Areas

Enables the creation of where employees can connect to a full Windows desktop experience directly from their smartphones via a USB-C cable, supporting a flexible, modern workspace design

Temporary Workers

W365 allows for quick provisioning and de-provisioning of cloud-based workspaces, giving or revoking immediately the access, ensuring security and flexibility

Travel Light

Allows users to access a full-fledged Windows environment from any device, allowing them to travel without heavy hardware while still having complete access to their work setup, ensuring productivity and convenience on the go

REVOLUTIONIZING COMMUNICATIONS

Seamless mobility with W365

Windows 365 enables employees to **travel light and work faster in a new employee experience**. They can access their full Windows desktop and applications from anywhere using just a smartphone. This mobility allows the redesign of spaces and supports a **dynamic work environment** where physical hardware is no longer a constraint.

Person-Centric Communication

Teams Phone transforms traditional telephony by **prioritizing people over devices**. It allows employees to carry their office number with them, ensuring they remain reachable regardless of their location. This **flexibility enhances communication** continuity and accessibility in a mobile-first world.

REVOLUTIONIZING COMMUNICATIONS

Fostering Hybrid Collaboration with Teams

Teams and Teams Meeting Room are at the forefront of modern, hybrid work. They **enable seamless collaboration from anywhere and on any device**. Whether in the office or remote, Teams provides a unified platform for communication, fostering a **collaborative** and **inclusive** work culture. Teams Meeting Room enhances meeting experiences by **integrating physical meeting spaces with virtual collaboration**, ensuring everyone, whether in-room or remote, is an equal participant in the conversation.

A New Era of Collaboration

Together, Windows 365, Teams Phone, and Teams Meeting Room embody a transformation in enterprise communications. They **support a work-from-anywhere paradigm**, ensuring connectivity and collaboration are always at the forefront. **This integration redefines the workspace**, making it more agile, inclusive, and conducive to a digital-first economy.

EMBRACE THE FUTURE WITH W365

We're here to guide you through every step – from analyzing your specific needs to seamlessly integrating Windows 365 into your existing infrastructure. Let's work together to unlock the full potential of your workspace.

- **Explore Windows 365** with a dedicated Pilot
- **Personalized Analysis**, assess your organization's unique needs and how Windows 365 can meet them
- **Seamless Integration**, benefit from our expertise in integrating Windows 365
- **Continuous Support**, our team is committed to providing ongoing support and guidance
